How it works

Designed specifically to enhance the performance of residual herbicides, Remix/ Grounded improves crop safety and establishment, enhances efficacy and increases yield.

Residual herbicides applied pre or early post emergence are often subject to turbulence under the spray boom, resulting in spray drift and poor soil coverage.

Remix/ Grounded is a unique blend of aliphatic hydrocarbons, hexahydric alcohol ethoxylates and C18-C20 fatty acids that reduce spray drift, ensure even spray deposition over the soil surface and increase adsorption to soil particles reducing crop effects.

Spray drift	Soil	
Drift control	Soil deposition	Soil adsorption
✓	✓	✓

Remix/ Grounded improves the efficacy of pre or early post emergence residual herbicides by reducing spray drift, improving deposition on the soil surface and increasing adsorption to soil particles.

Pack Size 5 litre standard

Dose Rate 0.2-0.4 l/ha
